UI Specification

Authentication Pages

### Login Page:

Users are presented with fields to enter their email and password to login. The green Login button submits the user's entry. The user will be notified if the email does not exist or if the password is incorrect. If the user is not currently registered with the application they can click the "Register" link to redirect them to the Register User Page to register themselves.

Register User Page:

Users are presented with fields to enter their email, name, and password for their new account. The user must also choose if their new account is an admin or a user account. The green Register button submits the user's entry. The user can also use the "Login" Link to redirect back to the login page

User Pages

All Documents Page:

There is a "Log Out" button provided in the top right to log out from current session. The main content of this page is a table of every document within the In Work Collection on the Database. The first column of the table is a collection of buttons for each row giving the user some actions to take for each document The "Submit for Review" button does not appear for documents with the Status Approved or Rejected. These buttons to not appear for documents that have the Status "Submitted for Review". The center column displays a preview of the document so the user can tell which document they are about to edit/delete/submit for review. The Third and final column shows the status of the document. At the bottom left of the table is an Add New Document button that will redirect you to the Document Editor Page for a blank document.

Document Editor Page:

Actions	Key	Value
Delete List HTML	review	reviewedit
Delete Text HTML	list	item1 X
		item3 X
		Append Item To List
Delete List Text	long	File Edit View Insert Format ↶ ↷ Heading 1 ∨ B I ≡ ≡ ≡ ≡ ⋯ **Heading** Text h1 tiny

Add

Save Document

Back button provided in the top right to return to All Documents Page. Main content of this page is a table with 2 columns. First column is actions for each row Such as Deleting the row or converting the editor provided within the row to another type. The second column contains the document editor. Each row can choose from one of three editor types; simple text entry, list entry, HTML Editor entry. Simple Text entry provides the user with two text boxes one for the key and one for the value. List entry provides the user with a text box for the key and a table of text boxes with a row for each item in the list. Each item in the list also has a button to delete the item. This table also provides a button to add more items to the list. Finally the HTML Editor entry

provides the user with a text box for the key and a larger more robust HTML text editor for the value.

Admin Pages
